March for Science, March for Magnetism

a poem in 19 lines that expresses my love
for science and for my adopted country

smooth
science
curves
around
the
moon
like
you, in
the early
morning
of our separation
of values heart meaning
and we, as a nation, as a group
are not divided;
we are multitudes, apart,
and with forces stronger than our individual selves,
we will remain,
magnetically,
together

-Maia Kumari Gilman
